

# TEACHRING

by Obermeier Systems

## What is the Teaching?

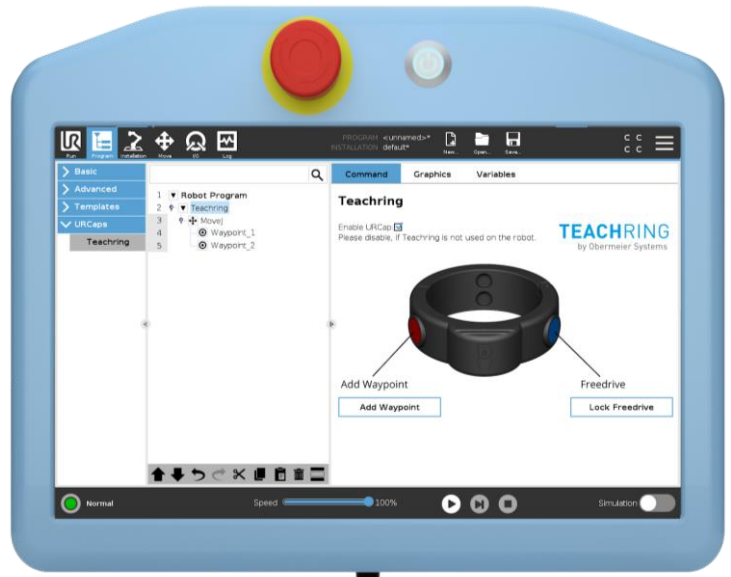

The Teaching by Obermeier Systems helps you to teach waypoints with your Universal Robot easily, fast and precisely. It is simple to mount as a snap-on device and intuitive to use via the Teaching UR Cap.

## How does it work?

The Teaching has two buttons, one to enable Freedrive and a second one to save waypoints in your robot program via a URCap. The Teaching saves you time and costs!

## Advantages & Benefits

- + Quick and easy to mount on the robot
- + No teach-pendant needed – you can use both hands to move the robot fast and precisely
- + Waypoints are saved to your robot program on the fly
- + Due to its design (round edges), the Teaching is suitable for human-robot-collaboration
